

Spolia^{design}

"Our mission is to build by saving natural resources"

Spolia Design Oy

Spolia Design Oy is a company specialized in the reuse of dismantled building parts and materials.

Reuse preserves the building's value - saves carbon dioxide emissions - saves virgin natural resources.

We master the concrete implementation of the circular economy from the demolition site to installation. We deliver reused products as if they were new and give them a product warranty.

Read more: www.spolia.fi
